- Improved compliance

### Key differentiators:

- Six Sigma
- Lean IT and ITIL Standards
- Emphasis on quality
- Highly Committed IT Professionals

## Capability Statement

**Sepal Analytics (SA)** was founded in 2015 as a startup, specializing in Data Analytics. We offer a full range of analysis services. We take pride in our professionalism, versatility and abilities to satisfy a diverse customer-base with technology, services and management solutions. SA plans, designs, and implements technically innovative, cost-effective solutions that are continuously on the leading edge of analysis to support our clients into the future.

We were formed to create an organization to help clients unlock the potential in their systems and realize the latent productivity in the data and associated processes. Our team has many years of experience in helping clients implement systems, create the data repositories and guide our clients through the rigors of implementation.

Our Goal: Practical application of the innovative technologies to build productive, proactive environments that serves our customers fully.
